

# BD Single Cell Seminar: *Introducing BD's Rhapsody System + AbSeq for Single Cell Analysis*

## Presentation will Include:

- BD's Rhapsody Technology (single cell analysis of 100s to 10,000s of single cells) & how it compliments current SC technologies being used in the UCSF research community
- How a targeted approach to single cell mRNAseq can provide your SC research with enhanced sensitivity and significant cost savings
- New single cell applications: Multiplexing Kits & AbSeq for simultaneous profiling of surface marker proteins and transcripts.

## Date Time & Location:

Tuesday 11/7 12-1pm HSW 1128 Conference Room  
(lunch will be provided)

## Please RSVP to:

Jonathan Slasinski  
Genomics Sales Specialist  
[jonathan.slasinski@bd.com](mailto:jonathan.slasinski@bd.com)

## Sponsored by:

UCSF Single Cell Analysis Center
